Eastern Health Ambulatory Care and Community Services - Referral Form Instructions

Instructions for referring

Reason for referral: Complete what your client's main presenting problem is. Comment on how the problem impacts on function (eg mobility, self-care, cognition, safety, pain), why you are referring and what is needed to improve the problem? Be specific and identify need clearly.

Client information: This data is essential for reporting to Department of Health and Human Services as well as for efficient referral processing. If information is incorrect or missing it may impact on whether the client accesses the required service in a timely way. Often a client has changed GP. Essential correspondence may not get to the GP without you confirming details. The referral may be returned to you with a request to complete all information.

Service requested: There are several ambulatory care and community services. In some cases the Community Access Unit may redirect your referral to a service best suited to need.

A summary of services is provided here:

Service	Details	Requirements	
Rehabilitation			
Community Rehabilitation Program	Client has experienced a change in function due to a recent acute medical/health event and requires goal-directed rehabilitation. If physio-only is required within 7 days of discharge, contact Post Acute Care (PAC). Home-based therapy requires justification.	Discharge summary for requested discipline(s) or indicate location in CPF (episode/tab and page number).	
Early Supported Discharge (Stroke)	Client requires intensive stroke rehabilitation Referrals will be accepted from Eastern Health acute and sub-acute wards only.	Notify ESD coordinator. Provide: Home Visit Risk Screen, Consent Form, Medical Discharge Summary, Allied Health Discharge Summary.	
Focal Spasticity Management Clinic	Provides comprehensive assessment and recommendations regarding focal spasticity management in adults with a neurological condition such as stroke, traumatic brain injury, multiple sclerosis, spinal cord injury and cerebral palsy.	The clinic is MBS funded so medical referral is required. External referrers to Eastern Health are responsible for organising allied health interventions for ongoing management.	
Specialist Clinics	<u>, </u>	<u> </u>	
Continence Clinic	Client requires assessment and management by medical and/or physio and/or nursing to address incontinence. Is over 16 years.	GP health summary, relevant investigations and medication list helpful.	
Falls and Balance Clinic	Client requires geriatrician PLUS physiotherapy & occupational therapy assessment to determine cause of falls/poor balance and recommendation re falls prevention strategies.	GP health summary, relevant investigations and medication list helpful.	
Cognitive Dementia and Memory Service- CDAMS	Client requires comprehensive multidisciplinary assessment to determine new diagnosis of possible/early dementia or related conditions. For inpatients, consider request for GP to refer to be included in EH discharge summary.	GP health summary and medication. Prior to first appointment, GP dementia screen required, ie CT brain, bloods and MMSE.	
Complex Care Clinic	Client requires geriatrician assessment of multiple age related medical conditions and/or requires diagnosis of cognitive changes which have progressed beyond early stage. Page 1 of 4	GP health summary and medication list helpful. If memory for investigation, dementia screen, ie CT
